

ENTER YOUR APP INTO THE BEST AFRICAN SOLUTION CATEGORY

It's **go** time
everywhere you go

Entries are now open for African developers

Are you part of Africa's Tech Generation, playing your part in changing the continent?
Are you an African innovator and entrepreneur? Have you developed an app that is solving a unique challenge in your country?

For the first time since launching ten years ago, the prestigious MTN Business App of the Year Awards are inviting app developers and coders from the rest of the continent to enter.

To date, these awards have played a vital role in elevating local entrepreneurs and showcasing exciting new innovations within the ICT industry in South Africa. MTN Business is pleased this year to broaden this platform, and to invest in and recognise African tech talent.

To qualify for entry into the Best African Solution, developers have to be living outside of South Africa, but within an African country and their app needs to be developed locally within their region.
